PROFESSIONAL SUMMARY

A highly skilled Technical Lead with 10+ years of experience specializing in designing and building high-performance, microservices-based applications. Expert in Java programming, cloud technologies (Azure), and Data Structures and Algorithms (DSA), Authentication & Authorization, Circuit Breaker, Redis Cache, Performance Testing (JMeter). Passionate about creating scalable, maintainable solutions and mentoring teams to achieve exceptional results.

TECHNICAL SKILLS

Java 17/11/8
Spring Boot
Microservices
Hibernate
Redis
JUnit
GitHub
SonarQube

Swagger
SLF4J
Apache Kafka
PL/SQL
PostgreSQL
Azure
AWS
Kubernetes

Photon Infotech Inc - Darden Restaurants

Feb'2023 – Present

- Developed the **Micro Services** using **SpringBoot** for all the project functionalities for loose coupling.
- Involved in Core JAVA concepts like Collections, Multi-threading, Serialization.
- Connecting to Azure appconfiguration to get config values. Automatic refresh once its get updated.
- Integrated Azure keyvault and Azure Redis cache into the application. Set Expire time and branch name for the cache. Flush the cache based on full key, key prefix or key suffix and branch name.
- Creating static swagger from the defined yml files and dynamic swagger from the rest endpoints
- Developed unit test cases using Mockito framework for testing accuracy of code and logging is done using SLF4J.
- Developed new components by analyzing the existing source code as part of the migration activities.
- Working on **Kafka** for streaming the live data.
- Involved in coordination and resolving UAT defects and update status in Azure ADO board.

Skills : Java 17, Spring Boot, Microservices, Kafka, Azure, Git, PostgreSQL, Redis, JPA, Swagger, SLF4J, JUnit

TVS Credit Services Limited - DIYA

Jul'18 – Jan'2023

- Led the design, development, and deployment of a two-wheeler loan processing platform using Spring Boot and microservices architecture.
- Provided technical guidance to the development team, ensuring adherence to coding standards, best practices, and high-quality deliverables.
- Designed and optimized PL/SQL procedures, functions, and queries to support core loan processing workflows.
- Integrated e-Mandate services for automated monthly EMI debit, including status tracking, validation logic, and reconciliation workflows.
- Developed a multi-threaded Kafka consumer application to enable parallel processing of messages across microservices.
- Applied Java design patterns to design scalable, maintainable, and reusable modules.
- Collaborated with business stakeholders to understand loan lifecycle requirements and translate them into scalable technical solutions.
- Deployed and managed application components on AWS (EC2, S3, RDS, CloudWatch, etc.) ensuring scalability, performance, and reliability.
- Reviewed code, conducted technical assessments, and mentored junior developers.

Skills : Java, Spring Boot, PL/SQL, Microservices, Kafka, AWS, SonarQube, Multi threading, Swagger, SLF4J, JUnit, Mockito

TVS Credit Services Limited - IES

Jun'17 – Jul'18

- Designed and implemented Spring MVC-based modules for customer onboarding, scheme selection, and loan eligibility validation.
- Developed Hibernate-based ORM components for efficient data persistence, optimizing queries and ensuring smooth interaction with the underlying database.
- Built workflow components to manage customer tele-verification processes, including mobile number.
- Implemented design patterns to improve code structure, reduce redundancy, and enhance system performance.
- Containerized application using Docker and deployed on Kubernetes reducing deployment time.
- Implemented and maintained SonarQube code quality checks across all Spring-based services, ensuring adherence to coding standards and best practices.

Skills : Java, Spring MVC, Hibernate, Kubernetes, SonarQube, Git, Swagger, JUnit, SLF4J

TVS Credit Services Limited - FastTrack

Aug'16 – Jun'17

- Designed and implemented UI/UX components using Layouts, Fragments, RecyclerView, ListView, CardView, and custom views
- Form validation, Retrofit services and functionalities
- Firebase Integration to keep track of issues and resolve issues as soon as issue occurs.
- Document upload to backend as multipart request.

Skills : Java, Android SDK, Google Play Services, Fragments, RecyclerView. Broadcast Receivers**TVS Next Private Limited - Inventory Management**

Jan'16 – Aug'16

- Design and build advanced applications for Android platform.
- Fixed bugs and improved application performance.
- Storing, updating, removing products data in SQLite Database.

Skills : Java, Android SDK, Google Play Services, Fragments, SQLite**EDUCATION**

- Bachelor of Engineering(Computer Science)
Arunai Engineering College, TamilNadu | 2015

ADDITIONAL INFORMATION

Work Authorization: H-1B visa holder, authorized to work in the U.S. until 09/2027. Available for visa transfer or extension if required.
